ACME PETROCHEMICAL DEMO COMPLEX - UNIT 2300

PIPING & INSTRUMENTATION DIAGRAM: PRESSURE RELIEF HEADER & KNOCK-OUT DRUM D-2320

Drawing Number: PID-23-0022 | Revision: Z1 | Process Unit: Unit 2300

1. CLOSED RELIEF HEADER & KNOCK-OUT DRUM D-2320

- Equipment Tag: D-2320 (Acid Aromatics Relief Knock-Out Drum)
- Equipment Class: Horizontal Vapor-Liquid Disengagement Vessel
- Design Pressure / Temperature: 3.5 kg/cm²g / 200 degC | Material: SA-240 Type 316L
- Dimensions: ID 1800 mm x T/T 5400 mm (Sloped 1:100 self-draining relief header)
- Connected Relief Discharges:
 - * Line 4"-PR-2301-316L from Preflash Column Relief Valve PSV-2301 (V-2301)
 - * Line 6"-PR-2304-316L from Decomposer Reactor Relief Valves PSV-2304A/B (D-2304)

=====

PID-23-0022 PAGE 2 OF 2 - LIQUID CONTAINMENT & THERMAL OXIDIZER VAPOR OVERHEAD

- Vapor Overhead from D-2320 flows via 12"-FL-2390-316L to Enclosed Ground Flare / Thermal Oxidizer
- Liquid Holdup in D-2320 is cooled with internal quench coil and pumped via Pump P-2320A/B to Slop Recovery.
